DETAILED ACTION

The Office acknowledges Applicant's election of claims 1-48 without traverse in response to the prior Office action.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to substrates having layers with polymeric waveguides and vertical optical couplers for coupling between adjacent layers classified in class 385, subclass 14. Figs 9 & 10.
- II. Claims 19-33 drawn to optoelectric layers laminated to one another class 385, subclass 14. Figs. 34-36.
- III. Claim 34 drawn to first and second boards disposed opposite one another so that corresponding switch devices and photodetector devices are aligned to one another classified in class 385, subclass 14. Fig. 143.
- IV. Claims 35-40 drawn to first and second optoelectronic multichip modules and at least one passive film with an OWG layer disposed proximate said bottom surfaces classified in class 385 subclass 14. Figs. 144-146.

Because these inventions are distinct for the reasons given above and the search required for each group above is distinct, restriction for examination purposes as indicated is proper.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 41, 45 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. *If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).*

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael P. Mooney whose telephone number is 703-308-6125. The examiner can normally be reached during weekdays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frank G. Font can be reached on 703-308-4881.
